Sommario/riassunto	By drawing on the complex interplay of ecology and feminism, ecofeminists identify links between the domination of nature and the oppression of women. This volume introduces a variety of innovative approaches for advancing ecofeminist activism, demonstrating how words exert power in the world. Contributors explore the interconnections between the dualisms of nature/culture and masculine/feminine, providing new insights into sex and technology through such wide-ranging topics as canine reproduction, orangutan motherhood and energy conservation.
