Sommario/riassunto	This extensively illustrated reference work is designed for health professionals who care for newborn infants including neonatologists, pediatricians, NICU nurses, pediatric neurologists, pediatric surgeons, geneticists, and genetic counselors. It describes the most common malformations and draws the information needed for a full diagnostic evaluation and discussion of treatment options and genetic counseling from many sources. The text also covers minor anomalies, birthmarks and includes dozens of charts of anthropologic measurements, material that is needed in the initial physical examinatio
