Sommario/riassunto	Social convergence has been an objective since the Treaty of Rome in 1957, but it was only in 1997 and 2000 that social and labour market policies were formulated at the European Union level. To what extent have national social and labour market policies in EU member states

converged over time? What is the influence of EU policy initiatives and European economic integration on national welfare state reforms? Moreover, what factors can explain differences in the extent to which member states have changed their policies accordingly? Based on quantitative analyses of welfare state changes since
