Sommario/riassunto	Mistakes, in the form of bad decisions, are a common feature of every presidential administration, and their consequences run the gamut from unnecessary military spending, to missed opportunities for foreign policy advantage, to needless bloodshed. This book analyzes a range of presidential decisions made in the realm of US foreign policy- with a special focus on national security-over the past half century in order to create a roadmap of the decision process and a guide to better foreign policy decision-making in the increasingly complex context of 21st century international relations.<BR
