

1. Record Nr.	UNINA9910789825103321
Autore	Abbott Maude E (Maude Elizabeth), <1869-1940.>
Titolo	Atlas of congenital cardiac disease [[electronic resource] /] / Maude E. Abbott ; with an introduction by Richard Fraser
Pubbl/distr/stampa	Montreal ; ; Ithaca, : McGill-Queen's University Press, c2006
ISBN	1-282-86595-1 9786612865954 0-7735-7545-6
Edizione	[New]
Descrizione fisica	1 online resource (109 p.)
Disciplina	616.12043022
Soggetti	Congenital heart disease Heart - Abnormalities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Published in commemoration of the 100th anniversary of the founding of the International Academy of Pathology.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	PART I: DEVELOPMENT AND COMPARATIVE ANATOMY OF THE HEART -- Plate I. Development of the reptilian and mammalian heart -- Plate II. Comparative anatomy: fish and amphibian heart -- Plate III. Comparative anatomy -- The Reptilian heart -- Plate IV: Incomplete torsion in the causation of cardiac defects (Spitzer's theory) -- PART II: CLINICAL CLASSIFICATION OF CONGENITAL CARDIAC DISEASE -- Plate V. Clinical classification of cardiac defects: illustrative diagrams -- General references. -- Group 1. No abnormal communication (acyanotic group) -- Plate VI. Anomalies of the aortic arch and its branches -- Plate VII. Coarctation of the aorta of the adult type (Historic cases) -- Plate VIII. Coarctation of the aorta (Personal cases and clinical features) -- Plate IX. A. Bicuspid aortic valve -- Plate IX. B. Supernumerary aortic cusps -- Plate X. Other anomalies of the endocardium -- Plate XI. A. Hypertrophy of the heart in infants -- Plate XI.B. Congenital rhabdomyoma -- Plate XII. Anomalies of coronary sinus -- PART II: CLINICAL CLASSIFICATION OF CONGENITAL CARDIAC DISEASE -- Group 2. Cases of arterial-venous shunt with terminal reversal of flow (cyanose tardive) -- Plate XIII. Patent ductus arteriosus -- Plate XIV. Defects of interauricular septum and patent foramen ovale -- Plate

XV. A. Defects of interventricular septum -- Plate XV. B. Defects of aortic system --
PART II: CLINICAL CLASSIFICATION OF CONGENITAL CARDIAC DISEASE
-- Group 3. Cases of permanent venous arterial shunt and retardation of flow (cyanotic group) -- Plate XVI. Symptomatology of congenital cyanosis -- Plate XVII. Pulmonary stenosis at lower bulbar orifice. All Cardiac septa closed -- Plate XVIII. A. Pulmonary and tricuspid stenosis with closed ventricular septum -- Plate XVIII. B. Eisenmenger complex -- Plate XIX. Pulmonary stenosis and atresia with defect of ventricular septum (Tetralogy of Follot) -- Plate XX. Pulmonary atresia with closed septum. Aortic, mitral and tricuspid atresias -- Plate XXI. Cor Triloculare biatriatum and biventriculare and persistent ostium commune -- Plate XXII. A. Cor Biloculare -- Plate XXII. B. Persistent truncus arteriosus -- Plate XXIII. Complete transposition of great trunks with closed ventricular septum -- Plate XXIV. Complete transposition of great trunks with defect of ventricular septum -- Plate XXV. A. Dextrocardia. Plate XXV. B. Corrected transposition and complete congenital heart block -- Chart 1. Statistics of congenital cardiac disease.

Sommario/riassunto

This reprint includes a short history of Abbott's life and how she came to create the Atlas, including a discussion of the material she used for her 1934 London Exhibit, which served as the basis for the Atlas. The original text and illustrations are enhanced by color prints of fifty-five specimens in the Abbott Collection of the McGill Pathology Museum.
