Sommario/riassunto

Mechanisms of Landscape Rehabilitation and Sustainability is based on the results of landscape rehabilitation with the help of fabricated soil and a new approach on the use of restored soils for building houses and communities. This book presents discoveries and proposals that have emerged from the authors' research and explains ways to protect Earth's ecosystems against further degradation. These proposals are founded on the philosophy of sustainable development and its application to various aspects essential to the long-term success of human beings; these include community coexistence, educa
