

1. Record Nr.	UNINA9910789887903321
Titolo	Seafloor geomorphology as benthic habitat [[electronic resource]] : GeoHAB atlas of seafloor geomorphic features and benthic habitats / / edited by Peter T. Harris, Elaine K. Baker
Pubbl/distr/stampa	London, : Elsevier, 2012
ISBN	1-283-34783-0 9786613347831 0-12-385141-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (947 p.)
Collana	Elsevier insights
Altri autori (Persone)	HarrisPeter T BakerElaine K
Disciplina	551.468
Soggetti	Submarine topography Benthos
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Introduction -- pt. 2. Case studies -- pt. 3. Synthesis.
Sommario/riassunto	The conservation of marine benthic biodiversity is a recognised goal of a number of national and international programs such as the United Nations Convention on Biodiversity (CBD). In order to attain this goal, information is needed about the distribution of life in the ocean so that spatial conservation measures such as marine protected areas (MPAs) can be designed to maximise protection within boundaries of acceptable dimensions. Ideally, a map would be produced that showed the distribution of benthic biodiversity to enable the efficient design of MPAs. The dilemma is that such maps do no
