Sommario/riassunto

The study of Russian is of great importance to syntactic theory, due in particular to its unusual case system and its complex word order patterns. This book provides an essential guide to Russian syntax and examines the major syntactic structures of the language. It begins with an overview of verbal and nominal constituents, followed by major clause types, including null-copular and impersonal sentences, WH-questions and their distribution, and relative and subordinate clauses. The syntax behind the rich Russian morphological case system is then described in detail, with focus on both the fairly standard instances of Nominative, Accusative and Dative case as well as the important language-specific uses of the Genitive and Instrumental cases. The book goes on to analyze the syntax of 'free' word order for which Russian is famous. It will be of interest to researchers and students of syntactic theory, of Slavic linguistics and of language typology.

Sommario/riassunto	Eignungsabklärung und -reflexion sind zentrale Bausteine vor dem und im Lehramtsstudium, um die Studien- und Berufswahl zu hinterfragen. Die Autor:innen der Beiträge beleuchten diesen notwendigen Modus aus der Perspektive von aktuellen Studien- bzw. Forschungsprojekten, explizieren u. a. Online-Self-Assessments, geben einen Überblick über Verfahrensweisen der Eignungsabklärung und -reflexion an Hochschulstandorten und ordnen die Thematik in multiperspektivische Zusammenhänge im Lehramtsstudium ein.
