Sommario/riassunto	This book analyses the contribution of Eugen (Jenő) Varga (1879-1964) on Marxist-Leninist economic theory as well as the influence he exercised on Stalin's foreign policy and through the Comintern on the international communist movement. During the Hungarian Councils' Republic of 1919 Varga was one of those chiefly responsible for transforming the economy into one big industrial and agrarian firm under state authority. After the fall of the revolutionary regime that year, Varga joined the Hungarian Communist Party, soon after which, he would become one of the Comintern's leading economists,
