Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Frontmatter -- Contents -- Boxed Texts -- Preface and Acknowledgments -- Part One. Key Principles and Players -- Part Two. The Devil Is in the Details -- In Summary -- Notes -- Index Written for anyone interested in green development-including policy Sommario/riassunto makers, architects, developers, builders, and homeowners-this practical guide focuses on the central question of how to conserve biodiversity in neighborhoods and to minimize development impacts on surrounding habitats. The Green Leap specifically helps move green development beyond the design stage by thoroughly addressing construction and post-construction issues. Incorporating many real-

world examples. Mark Hostetler explains key conservation concepts

and techniques, with specific advice for a wide variety of stakeholders that are interested in creating and maintaining green developments. He outlines the key players and principles needed to establish biodiverse communities and illustrates eight key design and management strategies. The Green Leap not only offers essential information for constructing new developments but also helps existing communities retrofit homes, yards, and neighborhoods to better serve both people and nature.
