| Sommario/riassunto | 'This book is a remarkable tribute to the memory of Pat de Mare. You will find in these pages a selection of his work that represents his new and different understanding of groups, both large and small, that has not only had a significant impact on the practice of group therapy in his lifetime, but also a potential for revolutionizing current thinking both now and in the future. The editors are owed a great debt of gratitude for putting so much important work together. They have organized the book around three sections on the small, median and large groups. What is particularly moving is that each section is introduced by some of Pat's closest friends and colleagues. These introductions are not only invaluable preparation for reading the articles by Pat that follow, but are also a poignant tribute to the writers' lives, work, their thinking and much happiness that came from their close relationship with Pat. |

Sommario/riassunto

In 1933, President Herbert Hoover commissioned the "Ogburn Report," a comprehensive study of social trends in the United States. Fifty years later, a symposium of noted social and behavioral scientists marked the report's anniversary with a book of their own from the Commission on Behavioral and Social Sciences and Education. The 10 chapters presented here relate the developments detailed in the "Ogburn Report" to modern social trends. This book discusses recent major strides in the social and behavioral sciences, including sociology, psychology, anthropology, economics, and linguistics.
