

1. Record Nr.	UNISA996214869203316
Autore	Pausanias
Titolo	Description of Greece . Volume V // Pausanias ; R. E. Wycherley, editor
Pubbl/distr/stampa	Cambridge, MA : , : Harvard University Press, , 1955
ISBN	0-674-99329-2
Descrizione fisica	1 online resource (304 pages) : illustrations
Collana	Loeb classical library ; ; LCL298
Disciplina	704.94993
Soggetti	History, Ancient, in art
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Describes ancient Greece from the author's first-hand observations.</p> <p>Annotation Pausanias, born probably in Lydia in Asia Minor, was a Greek of the 2nd century CE, about 120A-180, who travelled widely not only in Asia Minor, Palestine, Egypt and North Africa, but also in Greece and in Italy, including Rome. He left a description of Greece in ten books, which is like a topographical guidebook or tour of Attica, the Peloponnese, and central Greece, filled out with historical accounts and events and digressions on facts and wonders of nature. His chief interest was the monuments of art and architecture, especially the most famous of them; the accuracy of his descriptions of these is proved by surviving remains. The Loeb Classical Library edition of Pausanias is in five volumes; the fifth volume contains maps, plans, illustrations, and a general index.</p>

2. Record Nr.	UNINA9910790059303321
Autore	Clancy-Smith Julia Ann
Titolo	Mediterraneans [[electronic resource]] : North Africa and Europe in an age of migration, c. 1800-1900 // Julia A. Clancy-Smith
Pubbl/distr/stampa	Berkeley, : University of California Press, c2011
ISBN	0-520-94774-6
Descrizione fisica	1 online resource (469 p.)
Collana	The California world history library ; ; 15
Disciplina	304.8/611

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 425-432) and index.
Nota di contenuto	Front matter -- Contents -- Illustrations -- Acknowledgments -- Note on Transliteration -- Introduction: Peoplings -- 1. Arrival: Tunis the "Well-Protected" -- 2. Detours: Migrations in a Mobile World -- 3. Making a Living: Domestic Service and Other Forms of Employment -- 4. Making a Living: Petty Commerce, Places of Sociability, and the Down-and-Out -- 5. Making a Living: The Sea, Contraband, and Other Illicit Activities -- 6. From Protection to Protectorate: Justice, Order, and Legal Pluralism -- 7. Muslim Princes and Trans-Mediterranean Missionaries -- 8. Where Elites Meet: Households, Harim Visits, and Sea Bathing -- 9. Khayr al-Din al-Tunisi and a Mediterranean Community of Thought -- Epilogue: Fetched Up on the Maghrib's Shores -- Notes -- Glossary -- Select Bibliography -- Index
Sommario/riassunto	Today labor migrants mostly move south to north across the Mediterranean. Yet in the nineteenth century thousands of Europeans and others moved south to North Africa, Egypt, and the Levant. This study of a dynamic borderland, the Tunis region, offers the fullest

picture to date of the Mediterranean before, and during, French colonialism. In a vibrant examination of people in motion, Julia A. Clancy-Smith tells the story of countless migrants, travelers, and adventurers who traversed the Mediterranean, changing it forever. Who were they? Why did they leave home? What awaited them in North Africa? And most importantly, how did an Arab-Muslim state and society make room for the newcomers? Combining fleeting facts, tales of success and failure, and vivid cameos, the book gives a groundbreaking view of one of the principal ways that the Mediterranean became modern.

Autore	Bedon Chiara
Titolo	Buildings and Structures under Extreme Loads
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (434 p.)
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Exceptional loads on buildings and structures may have different causes, including high-strain dynamic effects due to natural hazards, man-made attacks, and accidents, as well as extreme operational conditions (severe temperature variations, humidity, etc.). All of these aspects can be critical for specific structural typologies and/or materials that are particularly sensitive to external conditions. In this regard, dedicated and refined methods are required for their design, analysis, and maintenance under the expected lifetime. There are major challenges related to the structural typology and material properties with respect to the key features of the imposed design load. Further issues can be derived from the need for risk mitigation or retrofit of

existing structures as well as from the optimal and safe design of innovative materials/systems. Finally, in some cases, no appropriate design recommendations are available and, thus, experimental investigations can have a key role within the overall process. In this Special Issue, original research studies, review papers, and experimental and/or numerical investigations are presented for the structural performance assessment of buildings and structures under various extreme conditions that are of interest for design.
