Sommario/riassunto

Spatial planning is a process. The focus of this book is on the sequence of key tasks that constitute the process and on special techniques that are suitable to conduct these tasks. Spatial planners require a number of skills to manage this process in an efficient manner, select the necessary tasks for each specific planning context, as well as the appropriate techniques for each task - always considering the people with whom and for whom they plan. Rather than recommending options, or 'recipes', this book stimulates critical thinking and questioning: What do we want to achieve? How c
