

1. Record Nr.	UNINA9910790088503321
Autore	Nesterenko Pavel N
Titolo	High performance chelation ion chromatography [[electronic resource] /] / Pavel N. Nesterenko, Phil Jones, Brett Paull
Pubbl/distr/stampa	Cambridge, : Royal Society of Chemistry, c2011
ISBN	1-84973-231-0
Descrizione fisica	1 online resource (317 p.)
Collana	RSC chromatography monographs, , 1757-7055 ; ; no. 14
Altri autori (Persone)	JonesP (Phil) PaullBrett
Disciplina	543.82
Soggetti	High performance liquid chromatography Ion exchange chromatography Complexometric titration Chelates Trace elements - Analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Established ion chromatography techniques have changed little since the 1980's but a new technique, high performance chelation ion chromatography (HPCIC), has revolutionized the area. HPCIC enables a much greater range of complex samples to be analyzed and this is the first comprehensive description of its use in the trace determination of metals. Written by world leaders in the field, it is aimed at professionals, postgraduates, chromatographers, analytical chemists, and industrial chemists. The book describes the underlying principles which give rise to the special selectivities that can be...
