| Sommario/riassunto | HauptbeschreibungReporting on a foreign war or a crisis is a challenging activity, a true professional test for a journalist. Media is often criticized for promoting violence by its conflict reporting: either by staying detached or by being biased.Peace, or conflict-sensitive, journalism was created for improvement of conflict coverage: it emphasizes the active role of journalists in de-escalation of conflict and encourages them to report on peaceful solutions. This relatively novel approach might be met with skepticism, as it appears too idealistic and demanding to be followed |
