Sommario/riassunto	Cable television, on the brink of a boom in the 1970s, promised audiences a new media frontier-an expansive new variety of entertainment and information choices. Music video, 24-hour news, 24-hour weather, movie channels, children's channels, home shopping,

and channels targeting groups based on demographic characteristics or interests were introduced. Cable Visions looks beyond broadcasting's mainstream, toward cable's alternatives, to critically consider the capacity of commercial media to serve the public interest. It offers an overview of the industry's history and regulatory trends, case studies of key cable newcomers aimed at niche markets (including Nickelodeon, BET, and HBO Latino), and analyses of programming forms introduced by cable TV (such as nature, cooking, sports, and history channels).

Sommario/riassunto

This book constitutes the thoroughly refereed postproceedings of the 5th International Workshop on Privacy Enhancing Technologies, PET 2006, held in Cavtat, Croatia, in May and June 2005. The 17 revised full papers presented were carefully selected from 74 submissions during two rounds of reviewing and improvement. The papers address most current privacy enhancing technologies in various application contexts.
