Sommario/riassunto

This study highlights the interaction between social protection (SP) programs and labor markets in the Latin America region. It presents new evidence on the limited coverage of existing programs and emphasizes the challenges caused by high informality for achieving universal social protection for old age income, health, unemployment risks and anti-poverty safety nets. It identifies interaction effects between SP programs and the behavioral responses of workers, firms and social protection providers, which can further undermine efforts to expand coverage, summarizing evidence from recent wo
