| Sommario/riassunto      | This work outlines available resources and proposed standards for<br>international NGO fact-finding missions: Chapter One presents an<br>introduction to the issue of NGO fact-finding. Chapter Two discusses<br>the problems caused by the lack of any generally-accepted guidelines<br>for NGO fact-finding, in contrast with contexts where NGOs have<br>achieved consensus. Chapter Three surveys proposed guidelines for                                                                                                                                                                                                                                                                                                                                            |

human rights and humanitarian NGOs. In addition, this section examines United Nations fact-finding standards, as well as examples of internal fact-finding standards for major NGOs. Chapter Four analyzes the fact-finding standards used in five specific cases: the International Crisis Group (Kosovo, 1999), the Independent International Fact-Finding Mission on the Conflict in Georgia (Georgia, 2008), United Nations Office of the High Commissioner for Human Rights Mapping Exercise on the Democratic Republic of Congo (1993-2003), Conflict Analysis Resource Center/University London study on Amnesty International and Human Rights Watch (Colombia, 1988-2004), and Human Rights Watch (Lebanon, 2006). The final chapter offers conclusions and recommendations.

Sommario/riassunto

The first book in a new series from the World Psychiatric Association, Schizophrenia: current science and clinical practice presents recent information on the diagnosis, neurobiological foundations, and management of schizophrenia. It evaluates the findings obtained with modern techniques like magnetic resonance imaging, genetics and network analyses. The book reviews the importance of neurocognitive functioning in schizophrenia and its predictive value for functional capacity. It covers the key areas of early recognition, prevention, rehabilitation and stigma. There is also a critic
