

1. Record Nr.	UNINA9910790184903321
Autore	Morris Jeffery T. <1961->
Titolo	Risk, language, and power [[electronic resource]] : the nanotechnology environmental policy case // Jeffery T. Morris
Pubbl/distr/stampa	Lanham, Md., : Lexington Books, c2012
ISBN	1-280-65901-7 9786613635945 0-7391-7055-4
Descrizione fisica	1 online resource (207 p.)
Disciplina	363.18/9
Soggetti	Deliberative democracy - United States Environmental policy - United States - Public opinion Nanotechnology - Environmental aspects - Government policy - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; List of Tables; List of Figures; Acknowledgments; Ch01. Introduction; Ch02. Risk, Regulatory Science, and Nanotechnology; Ch03. Language and Nanotechnology; Ch04. Power and Its Grip on Environmental Discourse; Ch05. Implications for Environmental Risk Debates; Ch06. Conclusions and Proposed Path Forward; Appendix: Charts Describing How Statements Can Be Organized; Bibliography; Index; About the Author
Sommario/riassunto	Risk, Language, and Power applies discourse analysis to public policy debates about nanotechnology, to explore how risk is used in language and practice to frame those debates. Morris argues that regulatory science by itself is inadequate to address risk concerns, and that public policy initiatives should be applied to broaden policy discourse around the environmental implications of emerging technologies.
