Life and Death, Care and Neglect -- Conclusion: Relations and Time -- Notes -- References -- Index
Sommario/riassunto	Chile is widely known as the first experiment in neoliberalism in Latin America, carried out and made possible through state violence. Since the beginning of the transition in 1990, the state has pursued a national project of reconciliation construed as debts owed to the population. The state owed a "social debt" to the poor accrued through inequalities generated by economic liberalization, while society owed a "moral debt" to the victims of human rights violations. Life in Debt invites us into lives and world of a poor urban neighborhood in

	Santiago. Tracing relations and lives between 1999 and 2010, Clara Han explores how the moral and political subjects imagined and asserted by poverty and mental health policies and reparations for human rights violations are refracted through relational modes and their boundaries. Attending to intimate scenes and neighborhood life, Han reveals the force of relations in the making of selves in a world in which unstable work patterns, illness, and pervasive economic indebtedness are aspects of everyday life. Lucidly written, Life in Debt provides a unique meditation on both the past inhabiting actual life conditions but also on the difficulties of obligation and achievements of responsiveness.

From Apperception

	to Objectivity -- 11. On the 'Second Step' of the B-Deduction -- Bibliography of Secondary Literature -- Index of Names -- Index of Subjects
Sommario/riassunto	In focusing on the systematic deduction of the categories from a principle, Schulting takes up anew the controversial project of the eminent German Kant scholar Klaus Reich, whose monograph "The Completeness of Kant's Table of Judgments" made the case that the logical functions of judgement can all be derived from the objective unity of apperception and can be shown to link up with one another systematically. Common opinion among Kantians today has it that Kant did not mean to derive the functions of judgement, and accordingly the categories, from the principle of apperception. Schulting challenges this standard view and aims to resuscitate the main motivation behind Reich's project. He argues, in agreement with Reich's main thesis about the derivability of the functions of judgement, that Kant indeed does mean to derive, in full a priori fashion, the categories from the principle of apperception. Schulting also shows that, given the general assumptions of the Critical philosophy, Kant's derivation is successful and that absent an account of the derivation of the categories from apperception, the B-Deduction cannot really be understood. New edition. First published 2012 as "Kant's Deduction and Apperception. Explaining the Categories" (Palgrave Macmillan)
