

1. Record Nr.	UNINA9910790330103321
Autore	Hillman Jonathan A (Jonathan Arthur), <1947->
Titolo	Algebraic invariants of links [[electronic resource] /] / Jonathan Hillman
Pubbl/distr/stampa	Hackensack, N.J., : World Scientific, 2012
ISBN	1-281-60372-4 9786613784414 981-4407-39-9
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (370 p.)
Collana	Series on knots and everything ; ; v. 52
Disciplina	514/.224
Soggetti	Link theory Invariants Abelian groups
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Abelian covers -- pt. 2. Applications : special cases and symmetries -- pt. 3. Free covers, nilpotent quotients and completion.
Sommario/riassunto	This book serves as a reference on links and on the invariants derived via algebraic topology from covering spaces of link exteriors. It emphasizes the features of the multicomponent case not normally considered by knot-theorists, such as longitudes, the homological complexity of many-variable Laurent polynomial rings, the fact that links are not usually boundary links, free coverings of homology boundary links, the lower central series as a source of invariants, nilpotent completion and algebraic closure of the link group, and disc links. Invariants of the types considered here play an essent
