Kellogg foundation school-based health care policy program -- section 3. Strategic partnerships for fiscal and policy advocacy -- section 4. School-based health care : looking to the future.
Sommario/riassunto	While there are numerous books and articles that concern themselves with dimensions of health and school-aged children and youth, this will be the first volume addressing practice, policy, and applied research on outcomes and impacts particular to school-based health care. This edited book, the first of its kind in over 20 years, attempts to address that need by capturing the current knowledge on school-based health care from the field of practitioners, researchers and policy advocates.
