

1. Record Nr.	UNINA9910790435303321
Autore	Strub Harold
Titolo	Bare poles : building design for high latitudes // Harold Strub
Pubbl/distr/stampa	[Ottawa] : , : Carleton University Press, , 1996 ©1996
ISBN	1-283-53150-X 9786613843951 0-7735-8490-0
Descrizione fisica	1 online resource (194 pages) : illustrations, maps
Collana	Carleton library series ; ; 185
Disciplina	721/.0911
Soggetti	Architecture - Arctic regions Architecture and climate
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	I People. Origins; Populations; Transitions; Lifestyles -- II Terrain. Earth and water; Air and fire; Flor and fauna; -- III Climate. Sunlight; Temperature; Wind, rain, and snow; Humidity -- IV Program. Settlement; Shelter; Owner; Logistics; Barriers -- V Design. Place; Neighbourhood; Geometry; Planning; Entries; Foundations; Walls; Windows; Doors; Roofs; Materials; Services -- Afterword -- Appendices.
Sommario/riassunto	"Designing successfully for people in the world's coldest climates demands a broad understanding of site conditions and their unique social context. Until now such knowledge often lay unarticulated in the minds of a few experienced practitioners or in the disappearing traditions of aboriginal peoples. Bare Poles is a guide for the future. A lively text, informed by more than 150 drawings, photographs, tables, and maps, it sets out the information and questions designers must keep in mind when building in high latitudes and remote communities. A key reference for architects, engineers, planners, builders, hamlet managers or building program administrators in the Canadian North - and a one-stop briefing for newcomers - Bare Poles is equally relevant to other polar regions and to cold climate zones at midlatitudes."-- Jacket.
