Nature Bonding : Impediments and Hopeful Prospects -- The High Cost of Ecological Illiteracy : Isolation of Ecology, Attitudes Toward Nature, Population Explosion -- Hopeful Prospects : an Historic Message that Almost Succeeded, Some Reasons for Hope.
Sommario/riassunto	Taking what he calls "a nature-centered worldview," author Robert Stebbins blends activities, examples, and stories with his perspectives on the importance of dealing objectively yet compassionately with

social and environmental problems. Even a quick glance through *Connecting With Nature* will make you wish you could give your students the joy of a day in the hills with the author. Failing that, you can use his book to instill a love of nature in your students-and rekindle it in yourself.
