

1. Record Nr.	UNINA9910790523703321
Autore	Grudzewski Wiesaw
Titolo	Application of dimensional analysis in economics // Wiesaw Maria Grudzewski and Krystyna Rosanowska-Plichcinska
Pubbl/distr/stampa	Amsterdam ; ; Washington, DC : , : IOS Press, , [2013] ©2013
ISBN	1-61499-280-0
Descrizione fisica	1 online resource (152 p.)
Collana	stand alone
Altri autori (Persone)	Rosanowska-PlichcinskaKrystyna
Disciplina	330.01/5195
Soggetti	Econometrics Economics, Mathematical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Title Page""; ""Preface""; ""Contents""; ""Measuring of Economic Quantities""; ""Economic Laws and Categories""; ""Economic Quantities""; ""Quantity Measuring Fundamentals""; ""Measuring Methods""; ""Analysis of Measuring Errors""; ""Sources of Systematic Errors""; ""Maximum Error in Indirect Measurements""; ""Establishing Approximate Values of Measurement Results""; ""Measuring Characteristics of Economic Quantities""; ""Measuring Methods for Economic Quantities""; ""Basic Measurement Criteria in Economics"" ""Measuring Methods for Duration Time of Economic Processes and Their Components"" ""Value Measuring""; ""Modelling of Economic Processes""; ""Quantified Models""; ""Origins of Economic Modelling""; ""Dimensional Analysis as the Basis for Formulation of Quantified Models""; ""Dimensional Quantities""; ""Dimensional Constants""; ""Principles of Dimensional Analysis""; ""Algebraic Framework of Dimensional Analysis""; ""Theorems of Dimensional Function""; ""Modelling of Processes Using a Composite Dimensional Function""; ""Computer-Oriented Modelling Description"" ""Parametric Notation of a Dimensional Function"" ""Parametric Description of a Composite Dimensional Function""; ""Experiment Designing Based on Dimensional Analysis""; ""Model Similarity Theory""; ""Building of Quantified Dimensional Models""; ""Procedures""; ""Dimensional Models of the Production Function""; ""Problem

Description"; "Production Function Models Based on Dimensional Analysis"; "National Income Models Proposed"; "Models of the Function of Expenses"; "Definition of a Function of Expenses for Consumer Goods"
"Generalised Model of a Function of Expenses for Necessities"
Function of Expenses Proposed for Durable Goods"; "Results of a Study Concerning Expenses for Selected Everyday Consumables";
"Economic Development Modelling According to the Model Similarity Theory"; "Concept of Creating Economic Development Models";
"Examples of Dimensionless Models of Economic System Development"; "Production Increase Model Described with a Dimensional Functional"; "Experiment and Practical Verification";
"Experiment in Modelling of Phenomena, Processes and Laws"
"Basic Verification Problems""Verification of Quantified Models";
"Conclusions"; "References"

Sommario/riassunto

The modeling of economic phenomena and processes, in terms of their static and dynamic features and with regard to the characteristics of their course, is a major methodological trend in studies of the nature, properties and functioning of contemporary management systems. Models describing management systems must be of a multi-aspect nature, entailing aspects such as technical, economic and sociological factors on the one hand, and forecasting, planning, leading, controlling etc., on the other. Developing a method for incorporating such diverse data into a system of analysis is, needless to sa
