Sommario/riassunto

Despite widespread agreement among economists that labor-intensive manufacturing has contributed mightily to rapid development in China and other fast-growing economies, most developing countries have had little success in raising the share of manufacturing in production, employment, or exports. Tales from the Development Frontier recounts efforts to establish light manufacturing clusters in several Asian and African countries, looking in particular at China. A companion volume to Light Manufacturing in Africa-which laid out a strategy for injecting new industrial growth nodes into African eco
