| Sommario/riassunto      | A long-overdue study, Nicole Raeburn's analysis focuses on the mobilization of lesbian, gay, and bisexual employee networks over the past fifteen years to win domestic partner benefits in Fortune 1000 companies. Raeburn reveals the impact of the larger social and political environment on corporations' openness to gay-inclusive policies, and   |

what strategies have been most effective in transforming corporate practices.

| Sommario/riassunto      | Federal regulations that govern research misconduct in biomedicine have not been able to prevent an ongoing series of high-profile cases of fabricating, falsifying, or plagiarizing scientific research. In this book, Barbara Redman looks critically at current research misconduct policy and proposes a new approach that emphasizes institutional context and improved oversight.   |

| Sommario/riassunto      | This thesis aims to contribute to a better understanding of turbulent open channel flow, sediment erosion and sediment transport. The thesis provides an analysis of high-fidelity data from direct numerical simulation of (i) open channel flow over an array of fixed spheres, (ii) open channel flow with mobile eroding spheres, (iii) open channel flow with sediment transport of many mobile spheres. An immersed boundary method is used to resolve the finite-size particles. |
