

1. Record Nr.	UNINA9910790610503321
Autore	Sonenshine Daniel E
Titolo	Biology of Ticks Volume 1 [[electronic resource]]
Pubbl/distr/stampa	Oxford, : Oxford University Press, USA, 2013
ISBN	0-19-937927-0
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (557 p.)
Altri autori (Persone)	RoeR. Michael
Disciplina	571.986
Soggetti	Arachnids Ticks -- Control Ticks as carriers of disease Ticks Ticks - Control Zoology Health & Biological Sciences Invertebrates & Protozoa
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover; Contents; Preface; Contributors; 1. Overview: Ticks, People, and Animals; 2. Modern Tick Systematics; 3. Life Cycles and Natural History of Ticks; 4. External and Internal Anatomy of Ticks; 5. Integument and Ecdysis; 6. Mouthparts and Digestive System: Anatomy and Molecular Biology of Feeding and Digestion; 7. Salivary Glands: Structure, Physiology, and Molecular Biology; 8. Excretion and Water Balance: Hindgut, Malpighian Tubules, and Coxal Glands; 9. Heme Processing and the Evolution of Hematophagy; 10. Respiratory System: Structure and Function 11. Circulatory System and Hemolymph: Structure, Physiology, and Molecular Biology 12. Fat Body and Nephrocytes: Structure and Function; 13. Nervous and Sensory Systems: Structure, Function, Genomics, and Proteomics; 14. Molecular Biology and Physiology of Chemical Communication; 15. Heme-binding Lipoglyco-storage Proteins; 16. Hormonal Regulation of Metamorphosis and Reproduction in Ticks; 17. Female Reproductive System: Anatomy, Physiology, and Molecular Biology; 18. Male Reproductive System: Anatomy, Physiology,

and Molecular Biology; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P;  
Q  
RS; T; U; V; W; X; Y; Z

**Sommario/riassunto**

Biology of Ticks is the most comprehensive work on tick biology and tick-borne diseases. This second edition is a multi-authored work, featuring the research and analyses of renowned experts across the globe. Spanning two volumes, the book examines the systematics, biology, structure, ecological adaptations, evolution, genomics and the molecular processes that underpin the growth, development and survival of these important disease-transmitting parasites. Also discussed is the remarkable array of diseases transmitted (or caused) by ticks, as well as modern methods for their control. This book
