

1. Record Nr.	UNINA9910790624503321
Autore	Weis Anthony John <1973->
Titolo	The ecological hoofprint : the global burden of industrial livestock // Tony Weis
Pubbl/distr/stampa	London, England : , : Zed Books, , 2013 [London, England] : , : Bloomsbury Publishing, , 2021
ISBN	1-350-22308-5 1-78032-099-X 1-78032-254-2 1-78032-096-5 1-78032-098-1
Descrizione fisica	1 online resource (202 p.)
Disciplina	338.176
Soggetti	Livestock systems - Environmental aspects Livestock - Environmental aspects Meat industry and trade - Environmental aspects Social impact of environmental issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contextualizing the hoofprint: global environmental change and inequality -- The uneven geography of meat -- The industrial grain-oilseed-livestock complex -- Confronting the hoofprint: towards a sustainable, just, and humane world.
Sommario/riassunto	The Ecological Hoofprint is a rigorous and eye-opening explanation of how industrial livestock production is driving the exploding global consumption of meat, which is implicated in momentous but greatly under-appreciated problems. Tony Weis, author of the ground-breaking The Global Food Economy, shows what this means for the health of the planet, how it contributes to worsening human inequality, and how it constitutes a profound but invisible aspect of the violence of everyday life.
