Note generali	First published in 1949.
Nota di contenuto	part one. Labour resources and utilization -- part two. Labour in employment -- part three. Unemployment -- part four. The direction of labour policy.
Sommario/riassunto	Labour focuses on the issues and problems concerning the efficient full employment of labour in a free market economy. The discussion is largely about the conditions (including comparative wages) underlying industrial efficiency and maximum production from various labour resources at least cost. By estimating manpower, analysing the human factor and measuring labour efficiency, the book summarizes recent evidence on employment conditions for or against efficiency and the effect upon the incidence of unemployment.
