

1. Record Nr.	UNINA9910790708603321
Autore	Green David M
Titolo	North American amphibians : distribution and diversity // David M. Green [and three others] ; authors
Pubbl/distr/stampa	Berkeley, California : , : University of California Press, , 2014 ©2014
ISBN	0-520-95672-9
Descrizione fisica	1 online resource (354 p.)
Classificazione	SCI008000NAT001000
Disciplina	597.8
Soggetti	Amphibians - North America
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- CONTENTS -- Preface -- Introduction -- Frogs of North America -- Salamanders of North America -- Mapping North American Amphibians -- Further Reading -- Notes -- Acknowledgements -- Index
Sommario/riassunto	Some 300 species of amphibians inhabit North America. The past two decades have seen an enormous growth in interest about amphibians and an increased intensity of scientific research into their fascinating biology and continent-wide distribution. This atlas presents the spectacular diversity of North American amphibians in a geographic context. It covers all formally recognized amphibian species found in the United States and Canada, many of which are endangered or threatened with extinction. Illustrated with maps and photos, the species accounts provide current information about distribution, habitat, and conservation. Researchers, professional herpetologists, and anyone intrigued by amphibians will value North American Amphibians as a guide and reference.
