Sommario/riassunto

An original approach to trend discovery and trade entry Initial forays into day trading stock index futures reveal a starkly different decision environment. There is no time to dwell on technical conditions. Intraday volatility in the stock indices is far more exaggerated than the daily bar charts of other markets, partly due to the extreme leverage, partly due to the intense attention. And positioning techniques that prove reliable in the action of the long-term trends in other instruments tend to fail in the counter trend reactions of the highly leveraged S&P futures contract within

| Sommario/riassunto      | Research has found immigrant youth perform better in school compared to their native-born peers. However, academic performance deteriorates with acculturation to US culture, whereas bilingualism has been associated with better performance in school. Perea examined whether language acculturation could explain the variation in academic grades among Dominican children of immigrants, and tested whether children who preferred Spanish and English equally had better grades than those who preferred English only. Results indicate benefits associated with bilingualism, however they also indicate a gender |
