

1. Record Nr.	UNINA9910790757303321
Titolo	Autoantibodies // edited by Yehuda Shoenfeld, M.D., FRCP, MACR, Professor of Rheumatology, Head: Zabludowicz Center for Autoimmune Diseases, Laura Schwarz-Kipp Chair for Research of Autoimmune Diseases, Tel-Aviv University, Sheba Medical Center, Tel-Hashomer, Israel, Pier Luigi Meroni, M.D., Professor of Rheumatology, Department of Clinical Sciences and Community, Health - University of Milan, Chief, Division of Rheumatology, Istituto G. Pini, Milan, Italy, M. Eric Gershwin, M.D., MACP, MACR, Distinguished Professor of Medicine, The Jack and Donald Chia Professor of Medicine, Chief, Division of Rheumatology, Allergy and Clinical Immunology, University of California at Davis School of Medicine, Davis, CA, USA
Pubbl/distr/stampa	Waltham, MA : , : Elsevier, , 2014
ISBN	0-444-59377-2
Edizione	[Third edition.]
Descrizione fisica	1 online resource (lx, 855 pages) : illustrations (some color)
Collana	Gale eBooks Elsevier science & technology books
Disciplina	616.978
Soggetti	Autoantibodies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part 1. Introduction : autoantibodies-unique characteristics -- part 2. Allergic disease autoantibodies -- part 3. Antineutrophil antibodies -- part 4. Introduction : antinuclear antibodies -- part 5. Autoantibodies to biologic factors/structures -- part 6. Cardiac autoantibodies -- part 7. Endocrine autoantibodies -- part 8. GI and liver autoantibodies -- part 9. Hematologic autoantibodies -- part 10. Kidney autoantibodies -- part 11. Neurological system autoantibodies -- part 12. Rheumatic disease autoantibodies -- part 13. Skin disease autoantibodies -- part 14. Unique clinical situations.
Sommario/riassunto	The new edition covers recent scientific advances, diagnostic techniques, and therapeutic technologies. Each chapter is focused on a single family of autoantibodies. This important reference contains historical notes, definitions, origins and sources of antigens recognized genetic associations, mediated pathogenic mechanisms, methods of

detection, as well as clinical utility (disease prevalence and association, diagnostic value, sensitivity and specificity, prognostic value). --

Publisher

This book covers recent scientific advances, diagnostic techniques, and therapeutic technologies in the field of autoimmune diseases. Each chapter is focused on a single family of autoantibodies, providing historical notes, origins and sources of antigens recognized genetic associations, mediated pathogenic mechanisms, methods of detection, as well as clinical utility (disease prevalence and association, diagnostic value, sensitivity and specificity, prognostic value).
