## Sommario/riassunto

Language and Power in Blogs systematically analyses the discursive practices of bloggers and their readers in eight English-language personal/diary blogs. The main focus is thereby placed on ties between these practices and power. The book demonstrates that the exercise of power in this mode can be studied via the analysis of conversational control (turn-taking, speakership and topic control), coupled with research on agreements and disagreements. In this vein, it reveals that control of the floor is strongly tied not solely to rates of participation, but more strikingly to the types of

Sommario/riassunto

Construction in the Landscape describes the impact of construction on the land and landscape where it takes place. Geographical coverage is necessarily global to reflect the great variation both in people's economic and social needs and in the shortage or abundance of natural resources. Part I introduces both land resources, whether used for agriculture, human settlement or mineral extraction or conserved as scenery, wildlife habitat or for the undefined needs of future generations; and construction, its products, skills, processes and impacts on land resources. Part II describes specific forms
