	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references.
	Nota di contenuto	Foreword / Mark S. Wright, Chancellor, Washington University in St. Louis -- Prologue -- The energy impoverished : seeking a greater understanding of a complex and wicked problem -- Narrative one: women, wood, and burning -- Patchwork lives in the Satkosia Gorge -- Narrative two: land & living -- The paradox of Kutch -- Narrative three: stalled by tradition -- Energy on the islands of Brahmaputra -- Narrative four: cause & effect -- Feedback loops in andhra pradesh and rajasthan -- Narrative five: searching for agency -- The power of people and communities -- Epilogue -- Endnotes -- Acknowledgements.
	Sommario/riassunto	Inside small homes and huts throughout the developing world, billions of people burn fires in rudimentary stoves to prepare their meals and heat their homes. Besides providing heat, these stoves also release large amounts of dense black soot, which has a staggeringly negative impact on the health, ecosystems, and advancement of the poor in the developing world. Fires, Fuel, and the Fate of 3 Billion examines the

complex nexus of issues at play in the developing world's use of crude cookstoves -- factors such as poverty, energy, environment, and gender inequality. Melding succinct prose, scient
