"We Solicit Our Freedom": Citizenship and the Patria -- 6. Indigenous Landowners and Native Ingenuity on the Borderlands of Northern Mexico -- Conclusion: Indigenous Archives and Knowledge -- Appendix -- Notes -- Bibliography -- Index
Sommario/riassunto	Saints and Citizens is a bold new excavation of the history of Indigenous people in California in the late eighteenth and nineteenth centuries, showing how the missions became sites of their authority, memory, and identity. Shining a forensic eye on colonial encounters in Chumash, Luiseño, and Yokuts territories, Lisbeth Haas depicts how native painters incorporated their cultural iconography in mission painting and how leaders harnessed new knowledge for control in other

ways. Through her portrayal of highly varied societies, she explores the politics of Indigenous citizenship in the independent Mexican nation through events such as the Chumash War of 1824, native emancipation after 1826, and the political pursuit of Indigenous rights and land through 1848.

The growth strategy -- Part F. Summary and challenges ahead -- Chapter 10. An integrated framework: achievements and challenges ahead -- Acronyms -- References -- Index.
Sommario/riassunto	Explores the factors leading up to the recent global financial and economic crisis, how the crisis unfolded, and the response of European and national authorities. The book describes the rationale behind the measures undertaken to mitigate the consequences of the recession

and to ensure that a similar situation does not happen again in the future. In the wake of the crisis, various major changes continue to significantly affect the life and social organization of Europeans. For instance, a new ESM with a size financially comparable to that of the IMF was created; similarly, the reforms in economic governance imply much more intrusive participation of European countries in each other's macroeconomic policies. Moreover, the organization, regulation, and supervision of the financial sector have been drastically revamped. The decisions taken by European and national authorities affect the daily lives of hundreds of millions of European citizens and countless more around the globe. An insightful read for anyone interested in understanding the topic and its effect on their lives, the book primarily addresses undergraduate students in their final year and graduate students in fields such as economics, finance, and political science. The main messages are explained through examples and charts. After reviewing the origins of the financial crisis in the first volume, this second volume focuses on the response given by national and European authorities.
