Sommario/riassunto

Jewishness in Russian Culture is devoted to new approaches and methods for the study of Jewish acculturation in Russian literature and its effects. It attempts to redefine criteria and borders of a discipline situated roughly between Judaica Rossica and Rossica Judaica. The monograph describes a series of important literary Russian-Jewish cultural events and figures belonging synchronically or diachronically to both disciplines. Thus it unites within a new conceptual framework the data accumulated by scholars and disciplines that exist separately in different research spaces that do not overlap, Jewish Studies and the history of Russian culture. The emerging picture shows the development of a historical plot along the axis of acculturation and anti-Semitism, accepting and/or trying to be accepted, being rejected and/or rejecting, and being within or without.
