

1. Record Nr.	UNINA9910790927603321
Titolo	Classifying psychopathology : mental kinds and natural kinds // edited by Harold Kincaid and Jacqueline A. Sullivan
Pubbl/distr/stampa	Cambridge, Massachusetts : , : The MIT Press, , [2014] ©2014
ISBN	0-262-32244-7 0-262-32243-9
Descrizione fisica	1 online resource (297 p.)
Collana	Philosophical psychopathology
Disciplina	616.89
Soggetti	Mental illness Psychology, Pathological
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; 1 Classifying Psychopathology: Mental Kinds and Natural Kinds; 2 Natural Kinds in Psychiatry: Conceptually Implausible, Empirically Questionable, and Stigmatizing; 3 Deeply Rooted Sources of Error and Bias in Psychiatric Classification; 4 Psychopharmacology and Natural Kinds: A Conceptual Framework; 5 Beyond Natural Kinds: Toward a "Relevant" "Scientific" Taxonomy in Psychiatry; 6 Natural Kinds in Folk Psychology and in Psychiatry; 7 Being a Mental Disorder; 8 Defensible Natural Kinds in the Study of Psychopathology 9 Oppositional Defiant Disorder: Cultural Factors That Influence Interpretations of Defiant Behavior and Their Social and Scientific Consequences 10 Syndrome Stabilization in Psychiatry: Pathological Gambling as a Case Study; 11 The Social Functions of Natural Kinds: The Case of Major Depression; 12 The Missing Self in Hacking's Looping Effects; 13 Stabilizing Mental Disorders: Prospects and Problems; Contributors; Index
Sommario/riassunto	Scholars question the extent to which current psychiatric classification systems are inadequate for diagnosis, treatment, and research of mental disorders and offer suggestions for improvement. In this volume, leading philosophers of psychiatry examine psychiatric classification systems, including the Diagnostic and Statistical Manual

of Mental Disorders (DSM), asking whether current systems are sufficient for effective diagnosis, treatment, and research. Doing so, they take up the question of whether mental disorders are natural kinds, grounded in something in the outside world. Psychiatric categories based on natural kinds should group phenomena in such a way that they are subject to the same type of causal explanations and respond similarly to the same type of causal interventions. When these categories do not evince such groupings, there is reason to revise existing classifications. The contributors all question current psychiatric classifications systems and the assumptions on which they are based. They differ, however, as to why and to what extent the categories are inadequate and how to address the problem. Topics discussed include taxometric methods for identifying natural kinds, the error and bias inherent in DSM categories, and the complexities involved in classifying such specific mental disorders as "oppositional defiance disorder" and pathological gambling. Contributors George Graham, Nick Haslam, Allan Horwitz, Harold Kincaid, Dominic Murphy, Jeffrey Poland, Nancy Nyquist Potter, Don Ross, Dan Stein, Jacqueline Sullivan, Serife Tekin, Peter Zachar.
