Nota di contenuto	pt. I. Seeing the problem -- pt. II. Where to from here? -- pt. III. Elements of the city -- pt. IV. Assessing the recovery.
Sommario/riassunto	Edward J. Blakely has been called upon to help rebuild after some of the worst disasters in recent American history, from the San Francisco Bay Area's 1989 Loma Prieta earthquake to the September 11 attacks in New York. Yet none of these jobs compared to the challenges he faced in his appointment by New Orleans Mayor Ray Nagin as Director of the Office of Recovery and Development Administration following Hurricane Katrina. In Katrina's wake, New Orleans and the Gulf Coast suffered a disaster of enormous proportions. Millions of pounds of water crushed the basic infrastructure of the city. A land area six times the size of Manhattan was flooded, destroying 200,000 homes and leaving most of New Orleans under water for 57 days. No American city had sustained

that amount of destruction since the Civil War. But beneath the statistics lies a deeper truth: New Orleans had been in trouble well before the first levee broke, plagued with a declining population, crumbling infrastructure, ineffective government, and a failed school system. Katrina only made these existing problems worse. To Blakely, the challenge was not only to repair physical damage but also to reshape a city with a broken economy and a racially divided, socially fractured community. *My Storm* is a firsthand account of a critical sixteen months in the post-Katrina recovery process. It tells the story of Blakely's endeavor to transform the shell of a cherished American city into a city that could not only survive but thrive. He considers the recovery effort's successes and failures, candidly assessing the challenges at hand and the work done-admitting that he sometimes stumbled, especially in managing press relations. For Blakely, the story of the post-Katrina recovery contains lessons for all current and would-be planners and policy makers. It is, perhaps, a cautionary tale.

Sommario/riassunto

"Across Europe there is a rapidly changing context for undertaking regional development. In the 20th century, development of the former planned economies (Bulgaria, Czech Republic, Hungary, Poland, Romania and Slovakia), was defined by these countries differences, rather than their common ideological roots. These disparities altered over time and were marked by changing social structures. However, the ranking of regions has remained the same as core areas have strengthened their positions while the structural obstacles to the modernisation of peripheral areas have remained due to a lack of coherent regional policy. This book examines the specific regional development paths of Central and Eastern European countries and evaluates the effects of the determining factors of this process. Through analysis of the system of objectives, instruments and institutions used in different eras, and case studies of Hungary, East Germany and Germany, development models are established and compared with Western European patterns. The book summarises the experiences of Central and Eastern European regional cooperation and examines the basic nature of the cohesion problems of the Carpathian Basin trans-national macro region. It confirms by comparative historical analyses that the transformation was indeed unique. This book will make a welcome addition to the literature for students and academics interested in the broader picture of Central and Eastern European politics, future integration within the European Union and the history of regional development processes"--
