Sommario/riassunto	Combining accessible writing with thorough scholarship, and rigorous historical accounts with insightful readings, John Williams's Film Music explores why Williams is so important to the history of film music. Beginning with an overview of music from Hollywood's Golden Age (1933–58), Emilio Audissino traces the turning points of Williams's career and articulates how he revived the classical Hollywood musical style. This book charts each landmark of this musical restoration, with special attention to the scores for Jaws and Star Wars, Williams's work as conductor of the Boston Pops Orchestra, and a full film/music analysis of Raiders of the Lost Ark. The result is a precise, enlightening definition of Williams's “neoclassicism” and a grounded demonstration of his lasting importance, for both his compositions and his historical role in restoring part of the Hollywood tradition.
