Sommario/riassunto	Economic development and the environment are presumed to be in conflict, but the latter part of the twentieth century experienced a

series of economic changes that increasingly questioned this view. Economic activity became more footloose and the ability to attract productive labor became a prominent regional development concern. Consequently, environmental amenities began to have a larger role in determining the patterns of regional growth and development, and subsequently moved to the forefront of current regional economic development thought and practice. Environmental amen
