Sommarrio/riassunto	<p>This Poverty Reduction Strategy Paper highlights that Togo's Strategy for Boosting Growth and Promoting Employment offers a medium-term development framework for implementing the Government's General Policy Statement, the Millennium Development Goals, and the</p>

Government's vision for making Togo an emerging economy in 15 to 20 years, as well as making it a country that respects human rights and promotes the rule of law. The return of political stability and peace to the country created a favorable environment for better governance, resumption of international assistance, and significant reduction in exterior public debt. The Government's medium-term economic policy for 2013–2017 will essentially be used to build and consolidate the foundations for Togo's future economic emergence. The focus will be on new priorities: boosting growth; employment and inclusion; strengthening governance; and reducing regional disparities and promoting grassroots development. Designing a national land-use plan will territorialize development by creating a more balanced national economic space. The new land-use scheme will be based on dynamic, competitive, regional economies in which the urbanization of regional capitals and secondary towns is sufficiently controlled to allow true development hubs to emerge.
