Sommario/riassunto	In Who Needs Jobs?, Lemieux explains how jobs are not the goal of economic life and how creating jobs should not be the goal of public policy. He delves into how income and prosperity are created (businesses producing what consumers demand), proposes solutions to the unemployment problem, and provides readers with the knowledge to navigate the jobs discussions of politicians and economists in America. With his approach, Lemieux takes this controversial and complex topic and makes it understandable, using economic analysis and real world examples.

Sommario/riassunto

A groundbreaking book on solving our growing energy problems In this visionary book, leading energy industry executive Robert Hefner puts forth a convincing case about how the world can move beyond its current dependence on oil and toward a new era of clean, renewable energy. Written with the knowledge and authority of a major player in this industry, Hefner relates how misguided government policies and vested industry interests have contributed to our current energy problems and proposes a variety of measures that could encourage the use of natural gas, solar, wind, and hydrogen.<u
