

1. Record Nr.	UNINA9910791161203321
Autore	Rescher Nicholas
Titolo	Logical inquiries : basic issues in philosophical logic / / Nicholas Rescher
Pubbl/distr/stampa	Berlin, [Germany] : , : De Gruyter, , 2014 ©2014
ISBN	3-11-034782-2 1-306-93581-4 3-11-034781-4
Descrizione fisica	1 online resource (154 p.)
Collana	Eide : Foundations of Ontology, , 2198-1841 ; ; Volume 6
Classificazione	CI 6585
Disciplina	160
Soggetti	Logic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Frontmatter -- Preface -- Table of Contents -- 1. The Duality of Logic -- 2. On Reductive Argumentation -- 3. Predicative Vagrancy and the Limits of Standard Predicate Logic -- 4. Paradoxes of Cognition -- 5. Meaninglessness -- 6. On Contingency and Necessity -- 7. Is there an Inductive Logic? -- 8. Provability Incompleteness in Gödel and Leibniz -- 9. Logic and the Interconnection of Philosophical Issues -- Name Index -- About the Author
Sommario/riassunto	Logic is of course a general resource for reasoning at large. But in the first half of the twentieth century, it developed particularity with a view to mathematical applications, and the field of mathematical logic came into being and flourished. In the second half of the century, much the same happened with regard to philosophical applications. Hence philosophical logic. The deliberations of this book cover a varied but interrelated array of key issues in the field. They address the representation of information in linguistic formulation, and modes of cogent demonstration in logic, mathematics, and empirical investigation, as well as the role of logic in philosophical deliberations. Overall, the book seeks to demonstrate and illustrate the utility of logic as a productive resource for rational inquiry at large.
