ISBN	1-61451-856-4 1-61451-513-1
Descrizione fisica	1 online resource (244 p.)
Collana	Studies in Generative Grammar, , 0167-4331 ; ; volume 118
Classificazione	KN 1370
Disciplina	491.8/515
Soggetti	Polish language - Phonology Polish language - Phonetics Polish language - Voice
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 217-227) and indexes.
Nota di contenuto	Chapter 1: Preliminaries -- Chapter 2: Sound system, phonology and phonetics -- Chapter 3: Cracow-Poznan Sandhi voicing -- Chapter 4: Progressive voice assimilation in Polish -- Chapter 5: Further issues.
Sommario/riassunto	For decades, the voicing system of Polish has been at the center of a heated theoretical debate concerning laryngeal phonology as it features a number of phenomena that constitute the core of this debate, such as Final Obstruent Devoicing, Regressive Voice Assimilation, and Progressive Voice Assimilation. As research into laryngeal phonology progresses on various fronts, it becomes more obvious that a large portion of the phenomena in question have phonetic or implementational conditioning, thus limiting the role of phonology even further. The model presented here is one in which phonology, phonetic interpretation, and phonetics find their respective homes. Paradoxically, by separating these three levels of description, we wish to integrate the disparate threads of modern research of sound patterns into one sound system.

#### Sommario/riassunto

This volume provides a comprehensive review of ERCP and EUS and the clinical conditions for which they are employed. Presented in a case-based format with accompanying videos, it will serve as a valuable practical clinical resource for gastroenterologists with an interest in ERCP and EUS. The text highlights major techniques involved in ERCP, reviews complications and recent data on preventing post-ERCP pancreatitis, and discusses important issues in ERCP training. The EUS chapters review the breadth of equipment available for performing EUS and EUS-FNA, detail the technique of performing EUS-FNA, and explore pertinent issues with training and assessing competency analogous to ERCP training. Valuable insights on the basics of cytopathology relevant to the endosonographer are summarized. The classic indication for EUS of staging luminal cancers is also examined in detail, while pancreaticobiliary indications are discussed highlighting newer adjunctive technologies including elastography and contrast-enhanced EUS. ERCP and EUS: A Case-Based Approach will serve as a very useful resource for physicians who perform or refer patients for ERCP and EUS. It provides a concise yet comprehensive summary of the current status of ERCP and EUS that will help guide patient management and stimulate clinical research. Supplementary video files are available for this book and can be accessed at <http://link.springer.com/book/10.1007/978-1-4939-2319-9>.

Sommario/riassunto	The F-35 Joint Strike Fighter is the most costly aircraft acquisition program in Defense Department history. RAND assessed the potential for savings by reconfiguring the U.S. Air Force's combat-coded F-35s into larger squadrons, adjusting the Primary Aerospace Vehicle Authorized (PAA) mix across the Active and Reserve Components, and adjusting the percentage of PAA permanently assigned to locations in the continental United States.
