| Sommario/riassunto      | Risk is everywhere, in everything we do. Realizing this fact, we all must try to understand this risk and if possible to minimize it. This book expands the conversation beyond failure mode and effects analysis (FMEA) techniques. While FMEA is indeed a powerful tool to forecast failures for both design and processes, it is missing methods for considering safety issues, catastrophic events, and their consequences. This new book focuses on risk and HAZOP as they relate to major catastrophic events, safety, and risk. Specifically it addresses the process and implementation as well as understanding the fundamentals |

of using a risk methodology in a given organization for evaluating major safety and or catastrophic problems.--

Sommario/riassunto

This volume contains 17 articles, developed from papers that were chosen from among the 44 presentations of work on NooJ presented at the 2013 International NooJ Conference in Saarbrücken in June, 2013. NooJ is a linguistic development environment that allows linguists to formalize a wide gamut of linguistic phenomena, and then test, adapt, share and accumulate each elementary description to build linguistic ""modules"", that is, structured libraries of linguistic resources. NooJ is also used ...
