Sommario/riassunto	This book constitutes the proceedings of the 6th International Information Retrieval Facility Conference, IRFC 2013, held in Limassol, Cyprus, October 2013. The 8 papers presented together with 2 short papers were carefully reviewed and selected from 16 high-quality submissions. IRF conferences wish to bring young researchers into contact with industry at an early stage. This sixth conference aimed to tackle four complementary research areas: information retrieval, machine translations for search solutions, and interactive information access.

Sommario/riassunto	L'intitulé de ce troisième colloque universitaire recouvre la première moitié du très beau titre de la thèse de doctorat de Joseph Rouffanche consacré à Jean Follain, Espace du cœur et passion du temps, dont le premier volet fut largement exploré lors de la rencontre de Mortemart en 2003. Le présent colloque marque une première étape fondatrice dans l'existence de la jeune Société des Amis de Joseph Rouffanche (S. A.J.O.R.), qui entend étudier et promouvoir l'œuvre du poète, ainsi que, plus largement, la poésie contemporaine. Il nous a semblé opportun d'ouvrir la définition de « l'espace du cœur » que propose le poète dans son mémoire, où l'expression représente « la mémoire des jeunes années, matériau de prédilection du poétique, substance dont presque tout poème plus ou moins se nourrit, que tout rappelle, où tout ramène, pour célébrer, magnifier, inventer, et pour un salut ». La terre limousine incarne le « luxe du cœur » de Rouffanche (Élégies limousines). Il s'agit là à la fois d'un territoire fondateur, symbole d'un certain rapport au monde, réalisé dans l'enfance. Mais « l'espace du cœur » recouvre différentes acceptions que les études présentées ici explorent finement : lien du poète à l'espace aérien ; temple de l'écriture ; compagnonnage avec des auteurs de prédilection ; proximité d'un bestiaire ; cadastre du monde et cartographie de l'âme.

Sommario/riassunto

The Handbook of Pesticide Toxicology is a comprehensive, two-volume reference guide to the properties, effects, and regulation of pesticides that provides the latest and most complete information to researchers investigating the environmental, agricultural, veterinary, and human-health impacts of pesticide use. Written by international experts from academia, government, and the private sector, the Handbook of Pesticide Toxicology is an in-depth examination of critical issues related to the need for, use of, and nature of chemicals used in modern pest management.
