Sommario/riassunto

Over the last decade, significant global and regional forces including changes in technology, trade patterns, and business practices, with a steady shift in value added production and employment toward knowledge-intensive activities and services such as finance, the hospitality industry, and the retail trade, have been affecting the production and occupational structures of most developed economies. Many countries of Eastern Europe and Central Asia have also experienced ongoing exposure to international product and labor markets, some via integration with the European Union (EU), and in genera
