

1. Record Nr.	UNINA9910791326403321
Autore	Lewandowsky Stephan
Titolo	Computational modeling in cognition [[electronic resource]] : principles and practice // Stephan Lewandowsky and Simon Farrell
Pubbl/distr/stampa	Thousand Oaks, [Calif.], : SAGE, c2011
ISBN	1-4833-4942-X 1-4522-3619-4 1-4522-2338-6
Descrizione fisica	1 online resource (x, 359 p.) : ill
Altri autori (Persone)	FarrellSimon <1976->
Disciplina	153.015118
Soggetti	Cognition - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; Preface; Chapter 1 - Introduction; Chapter 2 - From Words to Models: Building a Toolkit; Chapter 3 - Basic Parameter Estimation Techniques; Chapter 4 - Maximum Likelihood Estimation; Chapter 5 - Parameter Uncertainty and Model Comparison; Chapter 6 - Not Everything That Fits Is Gold: Interpreting the Modeling; Chapter 7 - Drawing It All Together: Two Examples; Chapter 8 - Modeling in a Broader Context; References; Author Index; Subject Index; About the Authors
Sommario/riassunto	This title introduces the principles of using computational models in psychology and provides a clear idea about how model construction, parameter estimation and model selection are carried out in practice. The book is written at a level that permits readers with a background in cognition, but without any modelling expertise.
