

1. Record Nr.	UNINA9910791334603321
Autore	Lawrence Glen D. <1948->
Titolo	The fats of life [[electronic resource]] : essential fatty acids in health and disease // Glen D. Lawrence
Pubbl/distr/stampa	New Brunswick, NJ, : Rutgers University Press, c2010
ISBN	0-8135-5423-3 1-282-56241-X 9786612562419 0-8135-4919-1
Descrizione fisica	1 online resource (501 p.)
Disciplina	612.3/97
Soggetti	Fatty acids in human nutrition Essential fatty acids - Physiological effect
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- CONTENTS -- FIGURES -- TABLES -- PREFACE -- ABBREVIATIONS -- PART ONE. Nutritional, Chemical, and Physiological Properties of Dietary Fats -- PART TWO. Dietary Fats in Health and Disease -- PART THREE. Influence of Diet on Overall Health -- APPENDIX A. FUNDAMENTALS OF CHEMICAL BONDING AND POLARITY -- APPENDIX B. FATTY ACID COMPOSITION OF DIETARY FATS AND OILS -- APPENDIX C. CHEMICAL STRUCTURES OF EICOSANOIDS -- APPENDIX D. HUMAN LIPOPROTEINS: THEIR COMPONENTS, PROPERTIES, AND ASSOCIATED PROTEINS -- APPENDIX E. OVERVIEW OF NEURONAL PROCESSES -- GLOSSARY -- REFERENCES -- INDEX -- ABOUT THE AUTHOR
Sommario/riassunto	Omega-3s, trans-fats, polyunsaturated fatty acids, linoleic acidùresearch facts about fatty acids and their relationship to heart disease and atherosclerosis, obesity, cancer, and neurological disorders abound. Chemical names appear on every nutrition label. But, just what do these terms mean in health and disease? The Fats of Life delineates the importance of essential fatty acids, with a focus on distinctions between omega-3 and omega-6 fatty acid variants. The chemical and biochemical characteristics of these fatty acids and their metabolism to

a vast array of potent bioactive messengers are described in the context of their potential effects on general health and impact on various diseases and neurological disorders. Glen D. Lawrence addresses in detail the capacity for polyunsaturated fatty acids to influence asthma, atherosclerosis, heart disease, inflammation, cancer, and immunity. Lawrence makes clear that our understanding of the biochemical and physiological effects of dietary fats has advanced tremendously as a result of careful research, but he also stresses that this knowledge has not easily translated into sound dietary recommendations.
